

# WHY TADIRAN?

TADIRAN. SIMPLY DONE RIGHT

## OUR CULTURE

Over 50 years of history and experience in the field of communications allows us to proudly state that we KNOW enterprise communications. Our employees are dedicated and are always ready to go that extra mile for our customers! And when it comes to problem solving, our "out of the box" thinking enables us to provide rapid response times to attain our goal of total customer satisfaction.

## SAVING YOU COSTS

The Aeonix UC&C platform supports standard protocols such as SIP (unmodified), CSTA, and Web Services. This non-proprietary architecture allows customers to seamlessly integrate a variety of common applications and to add desired devices to the system (Bring Your Own Device). This hardware independent platform is modular, enabling customers to buy only what they need when they need it. Its fast and easy deployment, high availability (active/active) and optimal utilization of resources make the Aeonix one of the most cost effective systems on the market today.

## WE ARE GLOBAL

Tadiran Telecom provides communications solutions to businesses of all sizes in 41 countries worldwide. Tadiran has regional offices in the USA, China, India, Russia and Israel. These provide exceptional support to our Global Business Partners.

## BEST PRODUCTS

Tadiran products feature a comprehensive family of products including Aeonix Unified Communications platform, IP-PBX, Contact Center, Dispatch Console, SIP phones and mobility applications. The Aeonix platform is the only enterprise level solution that can run on any virtualization platform. Aeonix utilizes open standards and interfaces, allowing Tadiran to quickly meet the requirements of an ever-changing market.

## DESIGNED FOR CLOUD

Tadiran's 'Bring Your Own Cloud' approach offers the flexibility of choosing the most suitable Cloud provider for your company, including IaaS providers such as AWS. Furthermore, Aeonix supports Cloud Portability, which allows Tadiran customers the flexibility to move their Aeonix deployments from one Cloud Service Provider or virtualization platform to another.
